

HOW DO I GET AN STI?

Chlamydia

You can get chlamydia by having vaginal sex, anal sex, or oral sex with someone who has chlamydia.

Gonorrhea

You can get gonorrhea by having vaginal sex, anal sex, or oral sex with someone who has gonorrhea.

Hepatitis B

You can get hepatitis B by having vaginal sex, anal sex, or oral sex with someone who has hepatitis B.

You can also get hepatitis B by sharing a needle or coming into contact with infected blood.

Herpes

You can get herpes by having vaginal sex, anal sex, or oral sex with someone who has herpes, and sometimes by genital touching.

HIV/AIDS

You can get HIV/AIDS by having vaginal sex, anal sex, or oral sex with someone who has HIV.

You can also get HIV by sharing a needle or coming into contact with infected blood.

HPV/Genital Warts

You can get HPV by having vaginal sex, anal sex, or oral sex with someone who has HPV, and sometimes by genital touching.

Syphilis

You can get syphilis by having vaginal sex, anal sex, or oral sex with someone who has syphilis, and sometimes by genital touching.

Trichomoniasis

You can get trichomoniasis, or "trich", by having vaginal sex.
